Lakier matowy / Matt lacquer / Mattlack

PL: Dla najbardziej wymagających frontów lakierowane są najlepszą decyzją – możliwość wyboru koloru z pełnej palety RAL/NCS pozwala zaspokoić każde życzenie. Najczęstszym wykończeniem jest mat (stopień połysku 30). Aby zagwarantować najwyższą jakość na materiał bazowy (frezowana płyta MDF) nakładane jest kilka warstw lakieru. Dla uzyskania lustrzanej powierzchni przy frontach wysoko połyskowych są one dodatkowo wielokrotnie polerowane.

DE: Für die anspruchsvollsten Kunden sind die Lackfronten die beste Entscheidung – die Vielfalt von Farben(RAL/NCS Palette) lässt keine Wünsch offen! Eine der häufigsten Oberflächen ist matt Beschichtung (Glanzgrad 30). Um die beste Qualität zu garantieren, werden auf den Trägematerial (gefräste MDF-Platte) ca. 5-8 Lackschichten aufgetragen. Um eine Hochglanz-Spiegeloberfläche zu erzielen, wird dann noch in mehreren Schritten poliert.

EN: Lacquer-coated furniture fronts are the best option for the most demanding needs - the ability to choose from the full RAL/NCS chart allows us to fulfil every requirement. The most popular finish is matt (gloss grade 30). In order to guarantee the highest quality, the base material (milled MDF board) is coated with several layers of lacquer. To achieve a glass-like surface of high gloss fronts, they are additionally polished multiple times.

IMI - BETON / IMI - BETON / IMI - BETON

PL: Wygląda jak beton. W dotyku przypomina beton. Imi-Beton nie jest jednak betonem, tylko innowacyjnym materiałem kompozytowym wykonanym z mineralnej hydro-masy. Pozwala na zaprojektowanie wnętrz z betonowym wykończeniem wszędzie tam, gdzie nie można użyć naturalnego materiału budowlanego w formie zaprawy cementowej. Podstawową zaletą betonu syntetycznego jest jego wielokrotnie mniejszy ciężar, jak również to, że nie pyli oraz jest ciepły i gładki w dotyku – w przeciwieństwie do autentycznego betonu.

DE: Es sieht wie Beton aus. Es fühlt sich wie Beton an. Doch Imi-Beton ist kein Beton, sondern ein innovativer Verbundwerkstoff aus einer flexiblen mineralische Hydro-Masse gefertigt. Mit Imi-Beton können Sie Innenausbauten in Betonoptik gestalten, überall dort, wo der Einsatz von herkömmlichen Bau-Materialien nicht möglich wäre. Der Grundvorteil dieses Materials ist sein mehrmals kleineres Gewicht, aber auch das, dass es kein Staub verursacht und auch warm und glatt in Berührung ist – im Gegenteil zur authentischen Beton.

EN: It looks like concrete. It feels like concrete. However, it is not. Imi - Beton is innovative composite material made of hydro-mass. According to that, you can design your interior giving it concrete-look especially, when it is impossible to use cement. The weight is primary advantage of synthetic concrete. Moreover, in comparison to authentic concrete, Imi - Beton is smooth and warm to the touch and there is no dust. It is perfect material to create a unique atmosphere.
