Lakier matowy - wysoki połysk / Matt lacquer - high gloss lacquer / Mattlack - Hochglanzlack

PL: Dla najbardziej wymagających frontów lakierowanych są najlepszą decyzją – możliwość wyboru koloru z pełnej palety RAL/NCS pozwala zaspokoić każde życzenie.

Najczęstszym wykończeniem jest mat (stopień połysku 30) lub wysoki połysk (stopień połysku 95). Aby zagwarantować najwyższą jakość na materiał bazowy (frezowana płyta MDF) nakładane jest kilka warstw lakieru. Dla uzyskania lustrzanej powierzchni przy frontach wysoko połyskowych są one dodatkowo wielokrotnie polerowane.

Ważne! - używamy tylko lakierów, które posiadają certyfikaty na kontakt z żywnością.

DE: Für die anspruchsvollsten Kunden sind die Lackfronten die beste Entscheidung – die Vielfalt von Farben(RAL/NCS Palette) lässt keine Wünsch offen!

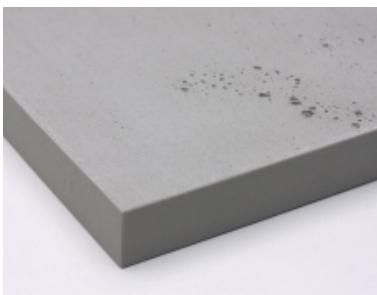

Eine der häufigsten Oberflächen ist matt Beschichtung (Glanzgrad 30) oder Hochglanz (Glanz 95). Um die beste Qualität zu garantieren, werden auf den Trägematerial (gefräste MDF-Platte) ca. 5-8 Lackschichten aufgetragen. Um eine Hochglanz-Spiegeloberfläche zu erzielen, wird dann noch in mehreren Schritten poliert.

Wichtig! – wir setzen nur Lacke, die für den Kontakt mit Lebensmittel zertifiziert sind.

EN: Lacquer-coated furniture fronts are the best option for the most demanding needs - the ability to choose from the full RAL/NCS chart allows us to fulfil every requirement.

The most popular finish is matt (gloss grade 30) and high gloss (gloss grade 95). In order to guarantee the highest quality, the base material (milled MDF board) is coated with several layers of lacquer. To achieve a glass-like surface of high gloss fronts, they are additionally polished multiple times.

Caution! - we only use lacquers which are attested for food contact.

IMI - BETON / IMI - BETON / IMI - BETON

PL: Wygląda jak beton. W dotyku przypomina beton. Imi-Beton nie jest jednak betonem, tylko innowacyjnym materiałem kompozytowym wykonanym z mineralnej hydro-masy. Pozwala na zaprojektowanie wnętrz z betonowym wykończeniem wszędzie tam, gdzie nie można użyć naturalnego materiału budowlanego w formie zaprawy cementowej. Podstawową zaletą betonu syntetycznego jest jego wielokrotnie mniejszy ciężar, jak również to, że nie pyli oraz jest ciepły i gładki w dotyku – w przeciwieństwie do autentycznego betonu.

DE: Es sieht wie Beton aus. Es fühlt sich wie Beton an. Doch Imi-Beton ist kein Beton, sondern ein innovativer Verbundwerkstoff aus einer flexiblen mineralische Hydro-Masse gefertigt. Mit Imi-Beton können Sie Innenausbauten in Betonoptik gestalten, überall dort, wo der Einsatz von herkömmlichen Bau-Materialien nicht möglich wäre. Der Grundvorteil dieses Materials ist sein mehrmals kleineres Gewicht, aber auch das, dass es kein Staub verursacht und auch warm und glatt in Berührung ist – im Gegenteil zur authentischen Beton.

EN: It looks like concrete. It feels like concrete. However, it is not. Imi - Beton is innovative composite material made of hydro-mass. According to that, you can design your interior giving it concrete-look especially, when it is impossible to use cement. The weight is primary advantage of syntetic concrete. Moreover, in comparison to autentic concrete, Imi - Beton is smooth and warm to the touch and there is no dust. It is perfect material to create a unique atmosphere.

Akryl / Acrylic / Acryl

PL: Elementy meblowe w wysokim połysku już od dłuższego czasu należą do trendu wnętrzarskiego designu.

Akryl, dzięki wieloletniemu rozwojowi produktowemu, jest dziś nie tylko materiałem o najwyższej jakości powierzchni, ale też materiałem o najlepszych właściwościach użytkowych: stabilność UV, odporność chemiczna i wodna jak również wysoka odporność na zarysowania.

Materiałem bazowym jest płyta MDF oklejona obrzeżem akrylowym (SOLO) lub dwuwarstwowy (DUO – efekt szyby). Płyty są dostępne w różnych kolorach - wysoki połysk (stopień połysku 90) lub głęboki mat.

DE: Glänzende Möbeloberflächen gehören schon längere Zeit zur Trends im Interieur Design. Acryl dank der langjährigen Entwicklungen ist nicht nur ein innovatives Material mit der höchsten Oberflächen-Qualität geworden, sondern auch ein Material mit den besten Gebrauchseigenschaften : UV-Stabilität, chemische Beständigkeit, Wasserbeständigkeit und hohe Kratzfestigkeit.

Der Träger ist eine MDF-Platte beklebt auf der Kante entweder mit dem gleichen Acryl (SOLO) oder Zwei-Farben-Kante (DUO-Glaseffekt). Zugängig in verschiedenen Farben als Hochglanz (Glanzgrad 90) oder Tief-Matt.+

EN: High gloss furniture has been on trend in terms of interior design for quite a long time now (High gloss furniture has been trend in interior design for quite a long time now). Thanks to many years of product development, acrylic is not only a type of material, which provides the highest quality of the finished surface, but also the best performance (properties): UV stability, chemical and water resistance, as well as high resistance to scratching.

The base material is an MDF board with acrylic edging (SOLO) or dual-layer edging (DUO - glass effect). It is also available in various colour options with a high gloss (gloss grade 90) or a deep matt finish.

MODULOSTYLING

PL: Modulostyling to małe akcenty wzornicze łamiące monotonię istniejących powierzchni ściannych czy też meblowych. Kolor i kształt nadają opatrzonym przedmiotom nowej formy, pozwalają ukryć wady czy usterki, też podkreślić i wyeksponować nieefektowne dotychczas przestrzenie. Łatwa, błyskawiczna aplikacja na wszystkie rodzaje podłoża. W standardzie dostępne kilka wzorów i kolorów, zarówno w wykończeniu matowym jak i highgloss.

DE: Modulostyling sind kleine Musterakzente, die die Monotonie der bestehenden Wandflächen oder Möbel durchbrechen. Die Farbe und die Form geben den alten Objekten neue Formen, erlauben Fehler oder Mängel zu verbergen und können aus bisher eher „unschönen“ Räumlichkeiten ihr Bestes herausholen. Einfache und schnelle Anwendung auf verschiedenen Trägern. Standardmäßig sind mehrere Designs und Farben verfügbar, sowohl matt als auch hochglänzend.

EN: Modulostyling are small design highlights which break up the monotony of the existing wall or furniture surfaces. Their colour and shape give the surfaces a new form, allow to conceal any defects or faults and to accentuate and expose previously unattractive surfaces. Easy and extremely fast application on all types of bases. We offer several standard designs and colours, with a matt and high gloss finish.

MODULOWALL

PL: Modulowall to chyba najprostszy i najszybszy sposób na znaczące poprawienie wyglądu danego pomieszczenia w najwyższej jakości finalnej bez zbędnego brudu i niesłownych fachowców. Doskonale prezentuje się zarówno jako akcent na mniejszych powierzchniach jak też jako struktura całej, dużej powierzchni czy wręcz całego pomieszczenia. Poza funkcją estetyczną służy również jako zabezpieczenie ścian przed uszkodzeniem czy szybkim zabrudzeniem w miejscach szczególnie na to narażonych. Modulowall dostępny jest w dwóch formatach, których łączenie zapewnia ciągłość wzoru we wszystkich kierunkach. Produkt dostępny w kilku frezowaniach i kolorach, w wykończeniu matowym i high gloss.

DE: Modulowall ist der einfachste und schnellste Weg, um das Aussehen eines Raumes mit der höchsten Finish-Qualität deutlich zu verbessern – und dies ohne unnötige Verschmutzung und ohne „unzuverlässige“ Fachleute. Es präsentiert sich fantastisch als Akzent auf kleineren Flächen, sowie als Struktur einer größeren Fläche oder sogar im ganzen Raum. Neben der ästhetischen Funktion dient es auch als Schutz vor Beschädigungen an den Wänden oder für Räumlichkeiten, die besonders Schmutz ausgesetzt sind. Modulowall ist in zwei Formaten erhältlich, die kombinierbar sind und die Kontinuität der Muster in alle Richtungen gewährleistet. Das Produkt ist in mehreren Fräsmustern und Farben, matt und hoch glänzend erhältlich.

EN: Modulowall is probably the simplest and quickest way to significantly improve the appearance of individual rooms, with the highest final quality, and without unnecessary mess and unreliable workmen. It looks great both as a highlight on smaller surfaces, as well as a structure of the entire, large surface or even the whole room. Apart from its aesthetic function, it also serves as protection for walls from damage and quickly gathering dirt in particularly prone areas. Modulowall is available in two formats which can be combined to achieve a consistent design in all directions. The product is available in a number of cut and colour options, with a matt or high gloss finish.

MASKOWNICE GRZEJNIKOWE

PL: Nasze maskownice grzejnikowe sprawiają, że mało ciekawy czy wręcz brzydki grzejnik staje się estetycznym elementem stanowiącym integralną część całego pomieszczenia. W błyskawiczny i prosty sposób stary grzejnik schowany za naszą maskownicą staje się nowym, wzorniczym akcentem w Twoim pomieszczeniu. Element dostępny jest w dwóch grupach wzorcowych: ażurowej oraz ramowej, w różnych rozmiarach i kolorach, z wykończeniem matowym oraz high gloss. Nowością w ofercie są obudowy stojące do maskownic grzejnikowych.

HEIZKÖRPERVERKLEIDUNGEN

DE: Unsere Heizkörperverkleidungen machen aus uninteressanten oder sogar hässlichen Heizkörpern wieder ein ästhetisches Element, das ein integraler Bestandteil des gesamten Raumes bildet. Die schnelle und einfache Möglichkeit alte Heizkörper zu erfrischen - es reicht aus, diese hinter unseren Heizkörperverkleidungen zu verstecken. Das Standardelement ist in sechs Modellen erhältlich sowie in verschiedenen Größen und Farben, matt und hochglänzend. Wir bieten auch Fensterbänke und Montagesystem für unsere Abdeckungen.

RADIATOR COVERS

EN: Our radiator covers can transform an unattractive or even ugly radiator into an aesthetic element, constituting an integral part of the entire room. In a prompt and easy way, an old radiator hidden behind our cover becomes a new design highlight of your room. The element is available in six standard designs, in various sizes and colours, with a matt or high gloss finish. We also offer window sills and an installation system for our covers.
